corypatterson 2017-03-02 15:31:03
are we all going to come up with a user story each?

daniel 2017-03-06 11:03:55
I guess so yeah

corypatterson 2017-03-07 16:35:57
ok cool

zeeman3000 2017-03-07 16:47:38
Hi gents, hate to be the bearer of bad news but I've just had a leave of absence approved

zeeman3000 2017-03-07 16:47:53
As such, I won't be continuing with the subject this semester

zeeman3000 2017-03-07 16:48:48
Let me know if you need me to xfer anything over, potentially ownership of the Git repository

zeeman3000 2017-03-07 16:49:06
I'm on Slack for work all day, so I'll see if you leave a message

zeeman3000 2017-03-07 16:49:10
Cheers and good luck

zeeman3000 2017-03-07 16:49:15
😘

daniel 2017-03-07 17:08:49
@zeeman3000 OK sorry to hear it can you transfer the git to me please?

zeeman3000 2017-03-08 11:35:27
Yeah mate, will do

zeeman3000 2017-03-08 11:38:40
@daniel You should have received a request for ownership transfer, let me know once you've had a

daniel 2017-03-08 12:30:12
Yeah all done cheers

Yeah all done cheers

zeeman3000 2017-03-08 13:24:27
Cheers lads, good luck with everything

corypatterson 2017-03-09 17:48:13
thanks

corypatterson 2017-03-09 18:36:26
I've changed all the effort levels to an actual time now. feel free to edit them to change the times, it w
know how it is with programming. It's probably going to take longer

daniel 2017-03-10 11:37:06
ok awesome thanks @corypatterson

daniel 2017-03-13 17:34:04
i have added a very basic mock up for the login/registration, cant stress how basic it is. I did this bec
sheet that we need one for tomorrow.

corypatterson 2017-03-13 18:01:00
OK cool
I'll check it out once I get home. And I'll have a look and see if there was anything else we needed to

corypatterson 2017-03-13 22:19:38
https://www.lucidchart.com/invitations/accept/e3b71b55-594d-4455-b18d-d6bbb84356bf

corypatterson 2017-03-13 22:20:44
that is the share link for the Class diagram, it's no where near complete. i thought it would be best to
tomorrow so everyone is on the same page

sohum 2017-03-14 17:50:49
@sohum has joined the channel

sohum 2017-03-14 17:59:58
Github name: rmit-s3377766-Sohum

sohum 2017-03-14 21:55:49
We're going to use this for the story points.

sohum 2017-03-14 21:55:51
http://pm.stackexchange.com/questions/10119/is-it-a-good-scrum-practice-to-use-large-story-point-n

Is it a good Scrum practice to use large story-point numbers for effort estimation?
Is it generally a good practice to have large story-points for user stories in a sprint? We are following
of 1, 2, 3, 5, 8, 13, 20, 40, 100. We estimate the effort consi...

sohum 2017-03-14 22:01:00
I don't think we need to go as big as 13 points. So I've stopped it at 8 points. I feel like any stories big
team of 4 would be too big to handle anyway in one sprint.

sohum 2017-03-14 22:02:53
I've also rearranged it a bit so the documentation and minutes are all on the far right of the Trello boa

corypatterson 2017-03-16 07:47:18
I couldn't figure out how to call a vote for a particular card, you seem to be only able to vote for a car
is add a checklist with some effort options. I didn't read the above until after i added it all so just igno
then. but basically just select the time you think would be needed for each user story. if your time ha:
comment instead. unless someone has a better way of doing this? I'm open to suggestions

corypatterson 2017-03-16 16:24:20
@daniel
I just created blank documents for all the stuff in the 'model' section of our program. I'll leave it up to
rest to github so you can sort them in the right folders (i.e. model and controller)

daniel 2017-03-16 16:26:04
Ok cool I've set aside tomorrow for soft Eng so I'll have it done by the weekend probably

corypatterson 2017-03-16 16:46:38
OK cool, we were aiming to have junit tests written for the login too right?

daniel 2017-03-16 22:11:22
yeah

daniel 2017-03-16 23:41:08
So i rearranged and used the code generators to populate our classes according to the diagram. Mo
a look 🙂

daniel 2017-03-16 23:41:14

ill do more tomorrow

daniel 2017-03-21 15:20:06
ive committed to the framework branch the unit test for login/register

corypatterson 2017-03-21 15:24:51
Awesome

corypatterson 2017-03-21 15:28:57
You've been busy haven't you @daniel

daniel 2017-03-21 15:33:06
Well it didn't take long at all

corypatterson 2017-03-21 15:34:13
OK fairo
If I get time I'll try and add a few more tests in the login test class

daniel 2017-03-21 22:14:14
on trello, under menu there is a filter section so you can show only cards assigned to you.

corypatterson 2017-03-21 23:56:56
Cool, I'll check it out

corypatterson 2017-03-22 12:10:37

I've added a few milestone checklists to the user stories in the sprint backlog. Feel free to break ther
you need. I'll be adding some more later today.

First things first is get the JUnit tests written though before implementing the real methods. So it's ev
get the tests done before commencing work on the actual class

corypatterson 2017-03-27 11:19:48
Hey everyone
Just wondering how everything is tracking

daniel 2017-03-27 13:18:58
Good I'll do some of the documentation and then finish off the utilities class I think

corypatterson 2017-03-27 13:39:38
OK sick

I'll get the tests for the login done by tonight

daniel 2017-03-27 19:38:59
Ive got the business info input working. also created the unit tests for the class and set up the dumm

daniel 2017-03-27 19:39:10
ill have it all done by class tomorrow

corypatterson 2017-03-27 19:42:21
Sweet as 👍

daniel 2017-03-27 21:49:40
So hows are you guys going @marcor @sohum

marcor 2017-03-28 01:51:09
hey hey guys, to be honest im not doing as well as i thought i would be. well discuss at our meeting.
out the structure of how i beleve the login sections should be done

marcor 2017-03-28 01:51:28
im just wrapping my head back around the java language

marcor 2017-03-28 01:55:23
Also i am a bit of a newbie when it comes to the Trello, where do i find the user stories we have alrea

daniel 2017-03-28 03:20:29
@marcor

The users stories are now in the product and sprit backlog, so in the login stories its just the Login P
@corypatterson has finished the tests so that might give you an idea about how the login system she

There is also a couple of exceptions written that you can throw to handle errors.

We can talk more tomorrow but im free most of the morning so hit me up with any specific questions

Tomorrow morning i will also be updating the class diagram so that might help too. 🙂

marcor 2017-03-28 15:40:16
Ok cool, i found the completed use cases. I have finished the outstanding use cases and moved the
product backlog.

corypatterson 2017-03-28 15:44:07
Lol, you guys were up so early, or late (whichever way you guys see it)

I have done the tests for the login, I thought the due date was meant to be for next week to have the
since our sprints are 2 weeks right?

Anyway, I'm happy to have a good discussion at the meeting today so we can sort this out for and ha
completed for next week

daniel 2017-03-28 15:47:16
Yea that's my bad I might have confused the sprint durations. But either way the assignment is due i
due dates today.

corypatterson 2017-03-28 15:49:54
All good. And that's closer than I thought

Shouldn't matter though, we are using TDD which should streamline our workflow quite nicely once
out of the way. I just hope @sohum is doing good

marcor 2017-03-28 17:38:18
hey guys, whats your eta?

marcor 2017-03-28 17:38:33
for todays meeting?

corypatterson 2017-03-28 17:38:46
10 seconds

corypatterson 2017-03-28 18:57:36
https://www.tutorialspoint.com/java/java_documentation.htm

Java Documentation Comments

including Java Syntax Object Oriented Language, Methods, Overriding, Inheritance, Polymorphism,
Collections, Networking, Multithreading, Generics, Multimedia, Serialization, GUI.

marcor 2017-03-28 23:40:56
hey bud, where should we store the user data?

marcor 2017-03-28 23:41:08
@daniel

daniel 2017-03-29 00:12:44
@marcor it has default local and the read write already imports and exports from there

daniel 2017-03-29 00:23:17
i have updated the documentation on github explaining how the data files are read and stored.

s3383022/SoftEng_2017_ABS
SoftEng_2017_ABS - A basic Appointment Booking System

daniel 2017-03-29 14:23:03
how did you guys go getting the git and eclipse set up?

corypatterson 2017-03-29 14:24:31
@daniel we got @marcor 's eclipse set up, I'm gunna type up some instructions for @sohum

daniel 2017-03-29 17:06:44
i think that the Class Diagram is done. let me know if there are any mistakes or things missing and il

corypatterson 2017-03-29 17:08:14
OK sweet thanks @daniel

daniel 2017-03-29 17:19:44
So ive just committed to master a few changes. it may effect what your working on so please pull it t
and fix the issues it will create. The commit notes explain why i had to change those things. Sorry bd

corypatterson 2017-03-29 17:41:39
All good

daniel 2017-03-29 17:45:03
Sorry about all the messages, i have mostly finished the sprint planning for sprint 2.

There are three items in the backlog unassigned @sohum i have assigned one to you that is a bit ea

They pretty much need to happen in order so if you take the top one make sure its done pretty soon
All of them include a test milestone, this can be a new test class or a test added to an existing test cl

Im moving on to other assignments now but i will keep the slack open.

corypatterson 2017-03-29 18:08:01
No problems

corypatterson 2017-03-30 18:55:14

corypatterson 2017-03-30 18:56:04
do we really need the user interface or can we get rid of it and just use the user abstract class instea
doesn't do anything

daniel 2017-03-30 19:00:26
Yeah I left it so we can reference users easier but if it doesn't do anything we will loose marks. It mig
few things so we don't have to updates all the references

corypatterson 2017-03-30 19:01:50
ok no worries,
i've also added a list of bookings to the abstract user class so we can keep track of a user's booked
make it easier later on when we have to display a users booked appointments. not sure if you will ha
text @daniel to save this list as well. unless I missed something and there was another way to tell wl

daniel 2017-03-30 19:11:08
Yeah true the customers own bookings are not saved to file, I'll add that.

corypatterson 2017-03-30 19:23:59

corypatterson 2017-03-30 10:20:00
OK sweet

sohum 2017-03-31 14:27:51
Ok, I'll update all the mockups to reflect this and I'll get started on the tasks allocated over the weeke
this due for submission? The 9th right.

sohum 2017-03-31 14:28:25
I've also finally manged to get Slack working and I now have full access. It was displayng a bunch of
to see conversations I wasn't tagged in which was super weird.

sohum 2017-03-31 14:28:58
I may not be able to get it done in time for the change of sprint, so whatever I don't finish in time for t
the next sprint.

daniel 2017-03-31 15:45:20
It's due 9 am on the 10th but it's important the coding is all done asap because the menu is needed

daniel 2017-03-31 17:39:36
I have updated the user interface to have methods, and updated some unneeded casts. also a little
classes. I've also got the input/output ready to handle storing the users own bookings.

There is a branch multiBusPartB or something like that and that branch has the version of the utils c
businesses, i wasn't going to merge this until part b.

lastly @sohum as i said on trello i added another test for the menu, there are two left ill do one more
have a go a writing the other one.

i'll be out of contact for the rest of the day

corypatterson 2017-03-31 17:41:20
No problems

marcor 2017-04-01 21:32:35
sounds good Daniel

marcor 2017-04-01 21:33:52
I have been having version issues with my mac and compiler the past couple days, however should
up by sunday 🙂

marcor 2017-04-01 21:33:56
ill keep ya updated

corypatterson 2017-04-01 21:34:26
Sweet as @marcor

marcor 2017-04-01 21:34:38
thanks mate

corypatterson 2017-04-02 13:22:29
Do we want the jUnit tests included in the ant build file?

daniel 2017-04-02 13:22:52
Guess not

corypatterson 2017-04-02 13:23:11
OK no worries

corypatterson 2017-04-02 14:07:31
Why don't we have a main class yet?

corypatterson 2017-04-02 14:12:13
We need to point the build file at a main class so it knows where to start. I can make one up now, it j
menu.print and menu.getinput for now I guess. But I'm assuming the main will be the controller of th
should probably move to the controller package as well?

daniel 2017-04-02 14:14:29
Yes but main should be in view also, the menu methods return the inputs or validated users so the m

between the menus and setting it all up.

corypatterson 2017-04-02 14:22:35
OK, so there are multiple menu types in the menu class. Or at least that's what we are hoping for. Th
the flow according to the received input

corypatterson 2017-04-02 14:22:47
I'll make the main class now then

daniel 2017-04-02 14:53:11
Yeah that right. And I was thinking that either the user auth or menu should store what the active use

corypatterson 2017-04-02 15:05:45
I'll have a think about it, I thought maybe just the main would store it, I'll see what's easiest

corypatterson 2017-04-02 15:16:53
@sohum how are you going with the menu class?

daniel 2017-04-04 23:46:56
The new guy isnt joining btw

daniel 2017-04-05 00:16:13
I have added two methods on the master branch to the utils class. one sets all the customers and or
customer to the array. The second one also checks if the new customer is unique. See the javadocs

corypatterson 2017-04-05 12:23:17
nice work

daniel 2017-04-05 13:53:27
@sohum you can just use the menu branch

sohum 2017-04-05 14:24:24
Oh ok, so I don't need to create a new branch?

daniel 2017-04-05 14:24:41
nah i did it and added some stuff

sohum 2017-04-05 15:38:09
Should I close that menujava branch then?

sohum 2017-04-05 15:38:17
And go back to the standard menu branch

sohum 2017-04-05 15:53:00
Also, at what point should I merge code back up?

sohum 2017-04-05 15:53:08
Just when I'm sure it's running correctly?

sohum 2017-04-05 15:53:17
Or at any point I write code?

sohum 2017-04-05 15:53:38
I'm a bit nervous about reintroducing bugs into the codebase.

corypatterson 2017-04-05 16:00:21
So you should commit to the menu branch you are working on often, then once you have the metho
the tests will pass) then you can make a pull request back to the master

sohum 2017-04-05 16:01:39
Oh, so you commit everytime you write code?

sohum 2017-04-05 16:01:47
Not just once when you're done and you think it's working.

sohum 2017-04-05 16:01:54
I didn't know that.

sohum 2017-04-05 16:02:06
I thought you only commit working or at least functional code.

daniel 2017-04-05 16:09:28
nah commit as you go and make a pull when your finished, then ill look at the pull and merge it to the

corypatterson 2017-04-05 16:24:50
If you want a general rule, try to commit every time you complete a method or add some important s

marcor 2017-04-05 19:47:15
just a genaeral question about the potential new comer to the group

daniel 2017-04-05 19:47:32
yeah

marcor 2017-04-05 19:47:33
when will we know

daniel 2017-04-05 19:47:38
he isnt

marcor 2017-04-05 19:47:46
awh cool

marcor 2017-04-05 19:47:53
that makes things easier

daniel 2017-04-05 19:48:13
yeah he emailed me and said they are going to try and finish what they starte

daniel 2017-04-05 19:48:22
started

marcor 2017-04-05 19:48:37
awh yep ok, good on them

sohum 2017-04-06 12:53:39
Does that mean we don't have an additional member?

daniel 2017-04-06 12:54:58
yeah

daniel 2017-04-06 19:57:21
@sohum have you got anything on the menu done? cos i need to go in and finish it now.

daniel 2017-04-06 22:42:37
I have finished the menu, its hard to test some parts without the login stuff finished tho. @marcor i h
auth so that the menu would even run for testing. its probabbly stuff you have already done so be av

daniel 2017-04-06 22:51:21
I just wanted to say that the finished menu is complex because it has a lot of validation, i was going
to screen parts i wanted @sohum to do.

The reason its got that much validation is so at the main method that runs the program we can alway
valid and makes navigation easier. It also helps us for later when we do a GUI, that's also why we us

Ill merge it to master now and @marcor see if you can get all the login/register working now.

Tonight i will also finish the last junit test.

finally @sohum can you work on preparing all the submission materials and documentation. This inc
diagram, don't leave that till last it might take an hour or so. Also the class diagram.

corypatterson 2017-04-06 23:16:39
OK cool @daniel

We figured out what was wrong with @marcor 's Github so he will be able to merge his stuff now, the
look like just one commit but it's explainable at least.

I'll have another look at the trello board and complete all the other things I have been assigned by to
home from work, that way we should have a mostly working application by saturday

home from work, that way we should have a mostly working application by saturday

daniel 2017-04-06 23:17:12
fingers crossed

corypatterson 2017-04-07 00:52:30
I've added the installation instructions to the wiki on Github and make some slight changes to the bu
now

sohum 2017-04-07 11:04:33
I've finished the menu and committed all changes.

sohum 2017-04-07 11:04:51
I finished all the cards assigned to me and commited them this morning.

sohum 2017-04-07 11:05:09
I've written about it more in the <#C4BS8V813lgit> channel.

sohum 2017-04-07 11:06:15
With some questions that I need some answers to.

sohum 2017-04-07 11:08:18
Regarding where to find submission materials.

sohum 2017-04-07 11:10:38
Yeah, just got that message now re menus. I'd completed all the menu functions (it should display to
figure out just how to do that. I've even included a few menu tests which it successfully passes. And
and registerUser functions.

sohum 2017-04-07 11:10:46
All are committed.

sohum 2017-04-07 11:11:01
Did that this morning.

daniel 2017-04-07 12:14:08
OK @sohum i wish you had checked the slack.

You say you have written new menu tests, sounds good where is the code for them? the version on
one i wrote.

I saw that you have written stuff for userAuth and registerUser, there is some right ideas there but its
Ignoring the fact that macro was doing that and you shouldn't have needed to use it in order to write

You have said on Trello that two of the viewing bookings cards are done. Where is the code for this?

It looks like you made a commit and then just merged the pull request, when you did that a lot of wor
Git would have told you this. This is why git opens one and then you have to separably merge it.
Your pull requests overrode 13 files, changing over 800 lines of code.

I messaged you yesterday more then once to see where you were up to with this, no one saw any co
commits.
And so like i said in slack on Thursday night "have you got anything on the menu done? cos i need t
No response so i wrote and finished the menu.

Your menu does pass some but not all of the tests, and what you did write is about what is in parts g
to so i would then add in some exception based validation.

So communication from you would have prevented this. We now might have to revert some commits pull or going and fixing up some stuff manually. In other words spending the little time we had left.

As for the changes to Trello you mentioned i had taken you off the coding and put you on other dutie And the submission materials questions i dont know what you mean by checkmarks and that list is fr blackboard.

daniel 2017-04-07 12:14:17

daniel 2017-04-07 12:27:06
I'm not sure what we do next. @marcor how's the login register coming, is your git working?

corypatterson 2017-04-07 13:09:12
I saw it yesterday, he has most of the validation done to a high standard which will hopefully look god
We figured out the problem with his git, he cloned the directory properly but when making his change
accidentally made his own version of the repository, so we got the real repository set up on his comp
tonight he'll have committed his part

@sohum, we can't see what's in your <#C4BS8V813|git> channel. It's just a notification stream for e

@daniel maybe we try and revert to the last version of the master on Github? I'm pretty sure we can

, I'll be working on all my assigned cards tonight when I get home at around 5:30. I'll be reachable by anything done just message it here. I plan on doing quite a bit of work, and if I get time I'll go around the wiki

corypatterson 2017-04-07 13:11:48
@sohum documentation wise there is a card on trello with all the needed documentation for the sub

sohum 2017-04-07 13:26:34
OMG. I"M SO SORRY!!!

sohum 2017-04-07 13:26:40
DID I just override code?

sohum 2017-04-07 13:26:41
OMG

sohum 2017-04-07 13:27:03
OH MY GOD!

sohum 2017-04-07 13:27:46
I thought that when I merged it back, only the new code I had written would be added to the Master?

sohum 2017-04-07 13:27:54
Isn't that how Github works?

sohum 2017-04-07 13:28:52
I am so so sorry.

sohum 2017-04-07 13:29:00
Oh man. I feel terrible.

sohum 2017-04-07 13:29:48
Github showed Green and said there were no conflicts.

sohum 2017-04-07 13:29:59
And I was like, oh ok, that's fine then.

sohum 2017-04-07 13:30:05
OMG

OMG

sohum 2017-04-07 13:30:13
I'm so sorry.

sohum 2017-04-07 13:34:36
Is there a way to revert the master branch back to an older version?

sohum 2017-04-07 13:34:41
Does Github do backups?

daniel 2017-04-07 13:34:42
@sohum Yeah, well its done now, its going to be a lot easier and quicker to revert the merge and co

This will mean there wont be any of your code in the program tho. That's why i had assigned you to
to do on trello.

So im going to go through tello and tidy up a bit then i want you to only work on the cards i assign yc
<#C4BCLHJN9|general> channel.

sohum 2017-04-07 13:35:11
Ok, that's fine. Oh thank god.

sohum 2017-04-07 13:36:04
I'll take the hit on my grade. When we do the peer reviews. Just say I royally fucked up a pull reques
files and we had to revert back undoing it.

sohum 2017-04-07 13:36:25
I'm ok with that. It doesn't make sense to hurt all of our grades because I made a mistake.

sohum 2017-04-07 13:37:33
I'll go through and find the individual lines of code I've added, instead of the files and then commit th

sohum 2017-04-07 13:37:56
Or maybe it's actually better to just avoid it altogether.

sohum 2017-04-07 13:38:07
I'm not sure if I'll just make it worse or not.

sohum 2017-04-07 13:38:26
Coding is really not my strongest suit. At all.

sohum 2017-04-07 13:39:28
One of the reasons I wanted to avoid coding as much as possible was precisely because I was afrai
program. And I did worse than that, I totally overrode files. Oh snap. That's actually terrible.

sohum 2017-04-07 13:40:40
The last time I checked trello yesterday afternoon I think, I still had a bunch of coding cards and was
going to drop those and focus on the non-coding tasks.

sohum 2017-04-07 13:41:25
At the moment, I've been assigned the compiling of all the submission files. I'll do that?

daniel 2017-04-07 13:46:11
@sohum leave the coding for now, because we have a finished working menu.

First get the updated master branch and open it in eclipse and have a look at how everything is set u
done for menu.

Then start on the high level diagram, this is basically a drawing of how the system is arranged. Next
needs to be updated on the class diagram. Check to see if you can add anything to the documentati
submission materials, some are simply exports that cant be done until we are done.

daniel 2017-04-07 13:47:13

ill leave sohums menu branch for now incase there is anything there we might need

daniel 2017-04-07 13:57:46
i've enabled branch protection on the master branch, now the pull has to be reviewed by someone e
And it wont let anyone commit directly to it.

sohum 2017-04-07 13:58:38
I um, I don't know how to write a high level diagram or class diagram. I know about them in theory, b
how to read Java code, so I don't often know what is what. I'll have to spend a day or two learning al
for this codebase.

sohum 2017-04-07 14:02:19
OMG. I just saw your direct message.

sohum 2017-04-07 14:02:39
It's actually under the fold.

sohum 2017-04-07 14:02:46
I did not know that existed.

sohum 2017-04-07 14:03:07
So that's what you meant by direct message.

sohum 2017-04-07 14:03:30
I will totally start checking that now that I know where it is..

daniel 2017-04-07 14:03:35
The class diagram is 90% done, its more about checking there isn't anything missing, basically it list
parameters for each class. Don t worry about the class diagram for now. the High level design, i mea
connects, its hard to explain, like a flow chart of how you use the system.

sohum 2017-04-07 14:03:58
I'll research the high level diagram and get that done.

daniel 2017-04-07 14:04:03
ok

marcor 2017-04-07 14:56:45
well thats not gone well

marcor 2017-04-07 14:57:18
update on me, validation is in depth. ive been commiting as i go. ill have another commit coming this
tonight after work

marcor 2017-04-07 14:57:36
and then we should be all finished up for my sections i think

marcor 2017-04-07 14:57:41

marcor 2017-04-07 14:57:42

sohum 2017-04-07 16:56:55
I'm too afraid to commit anything to github. But the two main sections I was working on are attached

sohum 2017-04-07 16:57:27
@sohum uploaded a file: Menu.java

sohum 2017-04-07 16:57:45
Menu.java

sohum 2017-04-07 16:57:55
And then UserAuth.java

sohum 2017-04-07 16:58:07
@sohum uploaded a file: UserAuth.java

sohum 2017-04-07 16:58:41
I had lots of help with them. Hopefully something in there is usable.

sohum 2017-04-07 16:58:54
Because I'm too afraid of Github after that disaster.

sohum 2017-04-07 16:59:13
Lesson in technology learned. If you're not 100% sure of how something works, stay away from it.

sohum 2017-04-07 16:59:31
So I'm afraid to commit them.

daniel 2017-04-07 17:00:08
Yeah like I said before the branch is there if anyone wants to check there but like I also said we alrea

working setup for all that

sohum 2017-04-07 17:00:48
I also created a branch called s3377766 just to view through it. If you could please delete it. I'm done
to delete it.

sohum 2017-04-07 17:00:55
I think you can also delete the Menu branch.

sohum 2017-04-07 17:01:20
You know what is confusing me about this. That all files are replicated to every branch.

sohum 2017-04-07 17:01:34
So when I edit a file locally, then upload it to a branch.

sohum 2017-04-07 17:01:38
then it merges back in.

sohum 2017-04-07 17:01:54
Github is taking the new file and then overriding the lesser of the up to date files right?

sohum 2017-04-07 17:02:13
Even if the one edited less recently is more functionality.

sohum 2017-04-07 17:02:34
If it's ok with you guys I'm going to try and stay away from Github after that disaster.

sohum 2017-04-07 17:03:11
Since the files i was working on are attached here.

sohum 2017-04-07 17:03:20
In slack. Neither branch is needed anymore.

daniel 2017-04-07 17:08:39
It sort of works that way but it's in the lectures and on the blackboard if you want to know but like I ex
decides based on when the changes are dated in relation to the other changes, so if it's used correc
version.

Like I said earlier this afternoon focus on the things I have assigned you to on Trello.

daniel 2017-04-07 23:07:17
is anyone working on the main method

daniel 2017-04-08 01:29:55
I've got main working for the stuff that's done, @marcor and @corypatterson it needs to be updated
@marcor your branch isn't ready to be pulled to master can you have a look and update is from the
working.

marcor 2017-04-08 03:10:00
added a few more comments for readability and finished off creating new
customer. I still need to check it with a compiler. my eclipse is playing up. 😞

marcor 2017-04-08 03:10:05
@daniel

marcor 2017-04-08 03:13:22
@corypatterson if you have a minute tommrrow perhaps we can go over the section together and do

corypatterson 2017-04-08 07:51:14
Yes that's fine @marcor

Sorry @daniel for not answering last night, I don't think any of us have started it but I'm happy to wo
need?

daniel 2017-04-08 11:29:18
All good I have started it it's mostly working few missing bits. It's on the main branch obviously so ha

corypatterson 2017-04-08 13:03:09
Rodger that, I'll do some extensive manual testing tonight of the whole system and write up the usag

daniel 2017-04-08 15:38:27
@marcor i have reviwed the pull request for the user auth, have a look and let me know if you want
mentioned.

daniel 2017-04-08 17:44:09
@corypatterson i merged your pull request *#18*.

corypatterson 2017-04-08 17:51:51
Sweet thanks, I also realised I left out a return statement in one of my functions so it would always fa
please merge that too. Also a couple of the menu tests don't work (as in they have errors) because i
user input but the automated test doesn't do that. Is there a way you know of to pass in stuff for that
test a different way? @daniel

daniel 2017-04-08 17:52:38
The junit tests do auto dummy input they must be failing for another reason

corypatterson 2017-04-08 17:54:32
Oh yep I see the problem now

daniel 2017-04-08 17:54:48
Its because the login stuff isnt merged yet, its not ready.

corypatterson 2017-04-08 17:55:30
Yeah so it's failing to login. No worries. I think that's why most of the other tests fail atm too

daniel 2017-04-08 17:55:58
yeah, if you see the stuff i put on the pull request for that branch it explains it there.

corypatterson 2017-04-08 17:59:03
Nah I hadn't looked sorry, I really need to start looking at all of the git messages in more detail

corypatterson 2017-04-08 17:59:26
If Marco doesn't reply soon I'll just go in and fix all that stuff

daniel 2017-04-08 18:00:15
yeah you (or marco) might want to update that branch from master first, resolve the conflicts then up

corypatterson 2017-04-08 18:04:21
Will do, don't worry I'm a pro with git. Marco's eclipse bloody hates git. We spent a good 2 hours tryi
eclipse but to no avail. So he's basically just writing them out and we'll have to check they run as exp
the main is kinda filled out he should be able to run with ant. I'll show him that once he resurfaces fr

corypatterson 2017-04-08 18:04:57
Have you done any more work on the main class that you haven't committed yet?

daniel 2017-04-08 18:05:00
yeah im going to merge the main now, its mostly done but makes it easier.

corypatterson 2017-04-08 18:05:36
Merge the main to the master?

daniel 2017-04-08 18:05:37
@corypatterson can you review the pull

daniel 2017-04-08 18:05:43
yes

daniel 2017-04-08 18:06:27
@corypatterson can i delete add-booking-path?

daniel 2017-04-08 18:06:32
patch*

corypatterson 2017-04-08 18:08:18
Oh yeah that's fine.

corypatterson 2017-04-08 18:09:24
I'm happy to write the rest of the main class, you've done plenty of coding. Or were you waiting for th

daniel 2017-04-08 18:13:52
well its hard to test and do more without log stuff and yeah the last to parts of main were based on y
gonna leave it for you

daniel 2017-04-08 18:14:16
im just working on comments javadocs and stuff like that

corypatterson 2017-04-08 18:22:19
Sweet, I'll fill it out. Once we can log in and most of the tests pass, I'll also fill out the rest of the usag

I'm just gunna go ahead and make the suggested changes now

marcor 2017-04-08 19:06:55
just got home

marcor 2017-04-08 19:07:35
working with @corypatterson on those changes now

marcor 2017-04-08 19:18:20
hey ma dudes, im currently comparing and updating class diagam

marcor 2017-04-08 19:18:26
will advise when updated

corypatterson 2017-04-08 19:19:15
Stand by for sitrep

corypatterson 2017-04-08 20:52:53
@daniel I've made the changes to user auth and it now passes all tests so it should work now.

corypatterson 2017-04-08 20:54:03
I removed the regex validation for now but put it in separate methods so we can fix them and add the

corypatterson 2017-04-08 20:56:09
Once the branch is merged I'll go through and manually test the system and finish the main method.
minimal fixes

daniel 2017-04-08 20:56:55
yeah it looks good but before i merge it i will make it throw the relevant exceptions.

corypatterson 2017-04-08 20:57:26
Oh yeah, sorry forgot to do that

daniel 2017-04-08 20:57:34
yeah its ok no stress

corypatterson 2017-04-08 21:15:39
Thanks man

@sohum how's the documentation coming along

daniel 2017-04-08 21:19:29
im resolving the conflicts now

corypatterson 2017-04-08 21:19:59
The old files should just be replaced with the new ones

corypatterson 2017-04-08 21:20:09
I have no idea how to do that

daniel 2017-04-08 21:22:01
i think its fine, probabbly, maybe…

corypatterson 2017-04-08 21:23:22
Yeah I think that worked

corypatterson 2017-04-08 21:23:42
I'll get to work doing the main method

corypatterson 2017-04-08 21:31:39
I had to resolve an error or two which must have happened during the merge. So I'll commit that now

daniel 2017-04-08 21:32:04
For what

corypatterson 2017-04-08 21:33:10
A duplicate method and missing curly bracket in the user auth class. Unless it was just my computer
again first to see if that fixes it

corypatterson 2017-04-08 21:34:27
Yeah Nah it's real, I'll push it now. I think I'll have to open a temp branch though

daniel 2017-04-08 21:34:47

daniel 2017-04-08 21:34:47
yeah hold off on that

corypatterson 2017-04-08 21:35:30
Ok, it's right down the bottom of the user auth class you want to have a look

daniel 2017-04-08 21:36:31
ive done that, check it out the login looks to be working, there is some issue with adding the custome
adding. Do you want to look at it or should i try and resolve it?

daniel 2017-04-08 21:37:17
thats whats stopping the booking tests for passing also.

daniel 2017-04-08 21:37:30
and there is an issue with the menu tests too but ill work on that now

corypatterson 2017-04-08 21:38:46
No worries I'll fix the booking now

daniel 2017-04-08 21:47:44
fuck yess! menu works

marcor 2017-04-08 21:50:51
fuuuuuuuuuuu

corypatterson 2017-04-08 21:50:53
HELLLL YEAHHHHH BOOYYYYZZZZZZZ

marcor 2017-04-08 21:51:07
i think you spelt boys wrong

daniel 2017-04-08 21:51:07
still plenty of other issues.

marcor 2017-04-08 21:51:09
daniel*

corypatterson 2017-04-08 21:52:30
Well once we have these bookings being made we are one step closer

marcor 2017-04-08 21:56:58
oh yeh

marcor 2017-04-08 21:57:12
class diagrams are all checked, amended and up to date

marcor 2017-04-08 21:57:23

daniel 2017-04-08 22:00:07
the menuTests all pass!

marcor 2017-04-08 22:00:26
daniel, i can only get so harf

marcor 2017-04-08 22:00:30
hard*

daniel 2017-04-08 22:00:35
ive just updated it

daniel 2017-04-08 22:01:33
Sync now and try

corypatterson 2017-04-08 22:05:38
I will in a moment, just trying to find out what the problem with the add booking is

daniel 2017-04-08 22:11:03
i think i fixed the adding but its still not passing the booking tests and main is missing the menu for th
tell

daniel 2017-04-08 22:11:15
i changed it to this

daniel 2017-04-08 22:11:16
if (this.bookings.isEmpty()) {
this.bookings.add(booking);
}

corypatterson 2017-04-08 22:12:07
Yeah I just changed that on mine too

daniel 2017-04-08 22:12:19
haha yeah

corypatterson 2017-04-08 22:12:24
It seems to think that the booking is already added

daniel 2017-04-08 22:12:44
might have to debug it

corypatterson 2017-04-08 22:12:54
Yeah I'm gunna do that now

daniel 2017-04-08 22:24:43
ok i know why, when we put the null check at the start we need to add a return so it doesn't continue

daniel 2017-04-08 22:24:57
like this

daniel 2017-04-08 22:24:58
if (this.bookings.isEmpty()) {
return this.bookings.add(booking);
}

daniel 2017-04-08 22:25:03
@corypatterson

corypatterson 2017-04-08 22:25:46
Yeah, I worked that one out too haha

It was adding, then in the same run saying yeah it's added

daniel 2017-04-08 22:26:06
yeah haha

corypatterson 2017-04-08 22:26:29
Also you need to add the register try catch to the other test

daniel 2017-04-08 22:26:46
yeah i just did that haha

corypatterson 2017-04-08 22:26:48
Now to work out what's wrong with the other one

daniel 2017-04-08 22:27:25
yeah the test is testing for stuff the adding isnt doing. not sure about the cancel yet tho

corypatterson 2017-04-08 22:28:26
Yeah, I altered the first test to create a new booking independent of the business structure and it pas

corypatterson 2017-04-08 22:28:40
So I think I'll do that to the other test as well

daniel 2017-04-08 22:28:50
yeah i fixed cancel, it was my fault i had written a few mistakes

corypatterson 2017-04-08 22:29:11
So both tests pass on yours now?

daniel 2017-04-08 22:29:46
bar the checking the booking was marked as taken it does

corypatterson 2017-04-08 22:30:55
Ah yes, because I didn't add that feature yet

What was the standard string to know it's taken?

daniel 2017-04-08 22:31:12
yep, if i comment that out all the junit tests pass!

daniel 2017-04-08 22:31:32
ok ill commit these changes and leave you to update the main and bookings stuff, that sound ok>

corypatterson 2017-04-08 22:32:32
OK, I'll scrap the stuff on my local branch and work off yours since you altered some other stuff too

corypatterson 2017-04-08 22:32:46
And yes, sounds pretty sweet

daniel 2017-04-08 22:32:50
soz yeah its the same anyways

corypatterson 2017-04-08 22:33:06
All g

daniel 2017-04-08 22:33:34
im closing git and eclipse now, ill do some commenting and javadoc stuff tomorrow night.

🙂 good work we got it all working 🙂

corypatterson 2017-04-08 22:34:18
Yeah, it feels good!

What was left to do with the bookings stuff?

daniel 2017-04-08 22:36:13
ok so have a look at the main class, there are the two methods there with TODOs that are the printir customers bookings.

Also when a user adds a booking it should be marked as booked (string status) and, this is up to you avBookings list for that business.

daniel 2017-04-08 22:36:56
depending on how you do that last part you might need to alter the bookingTest

corypatterson 2017-04-08 22:37:37
OK thanks. I struggle to remember stuff I needed to do when I get stuck into debugging

daniel 2017-04-08 22:38:38
im at an event tomorrow 11am-4pm then driving back to Melbourne so ill be contactable via slack.

If you get stuck save your changes and swap to the comments branch, that brach has heaps more c and it might mention it there somewhere. Otherwise the status and stuff is on the class diagram also

corypatterson 2017-04-08 22:44:21
Thanks man, have a good 'event' tomorrow

daniel 2017-04-08 22:45:17
It's a dungeons and dragons session

marcor 2017-04-08 22:45:53
awhhh sick, serious?

daniel 2017-04-08 22:47:03
Yeah I'm normally the Dungeon Master but I'm playing for a few months, gonna be rad.

corypatterson 2017-04-08 22:48:22
Nice, do you finish a whole game in 5 hours?

marcor 2017-04-08 22:48:34
dude thats mad, im still trying to get a couple mates together for a game. probs over easter

daniel 2017-04-08 22:49:17
We have lunch and when it comes down to it it's probably 3 hours of playing, it's one session so it's like and episode.

corypatterson 2017-04-08 22:51:08
Like a quest every session or something

That's pretty cool

daniel 2017-04-08 22:52:43
Yeah pretty much but sometimes it's a big quest over more the one episode.

corypatterson 2017-04-08 23:11:37
OK cool

corypatterson 2017-04-08 23:11:46
Sounds intense haha

daniel 2017-04-08 23:12:31
Haha it's great I think you guys would like it.

corypatterson 2017-04-08 23:15:18
Yeah maybe I'll give it a go one time

daniel 2017-04-08 23:16:20
Yeah well I'm thinking of starting a Melbourne game so I'll keep you posted on that

corypatterson 2017-04-08 23:37:00
Cool :)

marcor 2017-04-08 23:37:29
sounds mad, i would be down

sohum 2017-04-09 01:08:36
Haven't started on the documentation yet. I'm in an event today from 7.30am to 7.30pm but will start when I get home.

sohum 2017-04-09 01:08:55
Hopefully everything is completed by then and I start exporting githubs and trellos and slacks etc.

sohum 2017-04-09 01:09:21
If you guys could actually give me a gentle all clear when everything is done for me to start exporting

sohum 2017-04-09 01:11:12
I also need to add your peer reviews. Is there a specific document provided we do those in? Or do I breakdown of the percentages of the work completed?

sohum 2017-04-09 01:13:14
I don't fully know the breakdown but if I have to include one honestly and I had to guess, I'd say som daniel = 30%, marco = 30%, sohum = 10%.

sohum 2017-04-09 01:14:18
Is that a rough estimate? I don't fully know the breakdown of work between you guys.

sohum 2017-04-09 01:57:26
I've moved the submission trello card to documentation.

sohum 2017-04-09 01:57:52
Can you guys please attach everything you think will be helpful to that card?

sohum 2017-04-09 01:58:27
So for example, exported java docs is ticked off. Can you please then attach the exported file to that

sohum 2017-04-09 01:58:39
That way we have all the submission documents attached to the one card.

sohum 2017-04-09 01:59:15
It is less likely to miss anything or make mistakes or find an older version as we get closer to the sub

sohum 2017-04-09 02:00:36

marcor 2017-04-09 11:07:11
I'll be home earlier then you, so maybe I will start on that documentation on your behalf so that it's n night before?

marcor 2017-04-09 11:07:24
And you can finish it up when you arrive home?

marcor 2017-04-09 11:07:31
Thoughts

Thoughts

corypatterson 2017-04-09 11:18:54
Yeah good plan Marco

As for the peer review I think we all submit one separately maybe?

sohum 2017-04-09 13:30:36
Yeah that would be great. If you could do the high level architecture diagram. I think i can do everyth
do that exactly.

sohum 2017-04-09 13:32:39
I'll start compiling all the documents after I get home and will submit it all around 2am or 3am tomorr

corypatterson 2017-04-09 16:27:50
Last 2 problems I can find, the utilities needs to mark bookings as booked or available when loading
available which means users can double book a slot

Also, I realised that my add booking function doesn't work as I imagined. If the date for the booking v
as '10/10/17' this would fix it

marcor 2017-04-09 16:37:01
Alright, do you require assistance with this this evening Cory?

marcor 2017-04-09 16:37:32
You haven't indicated a specific person for this :)

corypatterson 2017-04-09 16:38:24
Sorry. I thought @daniel might take a look at the utilities since he wrote and understands it properly

daniel 2017-04-09 17:12:22
Yeh I can fix the utilities it's not an issue with the reading its an issue with the writing it doesn't write t
pretty simple to add, then it should work fine. So as for the date it's just a matter of changing the dur
that format.

daniel 2017-04-09 17:12:44
I'll also update the user auth to Handle owners login

corypatterson 2017-04-09 17:17:07
OK cool. Oh yeah I forgot about the owner login, that should be just an if statement though so not to

I'll go through and change all the dummy data after dinner

daniel 2017-04-09 17:20:34
Ok you do the dummy data date and I'll do the status read and write

daniel 2017-04-09 17:20:54
Yeh the owner stuff was fine, there might be a neater way of doing it but the way I did it works

marcor 2017-04-09 18:25:57
Just grabbing some dinner and I'll be up in about halfa guys

corypatterson 2017-04-09 18:27:06
No problems I'll grab my laptop and edit the dummy data now

daniel 2017-04-09 18:30:58
OI so all that's done. Now and the commenting and java docs are done. The program is mostly finish
that needs a new line to print but that's it. I'll update the git and make a release and then it's just prep

corypatterson 2017-04-09 18:31:33
OK
Wait for me to update this data though

daniel 2017-04-09 18:37:20
Yeah will do

corypatterson 2017-04-09 18:50:06

Data is updated

daniel 2017-04-09 19:15:20
cory can you review the final pull

daniel 2017-04-09 19:16:28
@corypatterson

daniel 2017-04-09 19:38:00
Alpha release is up. Check it out.

Ill start by updating the class diagram

daniel 2017-04-09 19:38:04

corypatterson 2017-04-09 19:41:37
Where do I find the alpha release?

daniel 2017-04-09 19:41:55
on git under releases.

daniel 2017-04-09 19:42:37
the main bar menu commits, branch, release

corypatterson 2017-04-09 19:54:14
Hey that's pretty cool

Did you happen to compile the jar file?

marcor 2017-04-09 19:54:35
hey, thats pretty good

daniel 2017-04-09 19:54:35
arr no

daniel 2017-04-09 19:54:49
ill do that and deleate and relplace the release

corypatterson 2017-04-09 19:56:11
Sorry, I forgot to tell everyone!

daniel 2017-04-09 19:56:28
im getting a build error

daniel 2017-04-09 19:56:38
BUILD FAILED
C:\Users\Daniel Caddaye\Documents\GitHub\softengsem12017\build.xml:14: Unable to find a javac
com.sun.tools.javac.Main is not on the classpath.
Perhaps JAVA_HOME does not point to the JDK.
It is currently set to "C:\Program Files\Java\jre1.8.0_121"

corypatterson 2017-04-09 19:57:10
Hmmm
I'll do it from mine and upload it

corypatterson 2017-04-09 20:01:53
Well
Now I have that error too which is weird because it worked fine before. I'll have to debug it

daniel 2017-04-09 20:10:30
i got it working, it was defaulting to the JRE not the JDK

corypatterson 2017-04-09 20:12:00
Yeah
Literally just finished doing it the same time as you haha

corypatterson 2017-04-09 20:12:22
This is like a repeat of yesterday

daniel 2017-04-09 20:16:58
ok but does it run from the built file for you

corypatterson 2017-04-09 20:18:56
Yeah, very slow though

Maybe we should just leave it out for now

daniel 2017-04-09 20:27:35
ok ill check back in a few hours

corypatterson 2017-04-09 20:29:18
Lol, yeah do we need that working properly for part a?

Also did we want to just agree on a peer submission percentage together?

marcor 2017-04-09 20:34:03
hey guys

marcor 2017-04-09 20:34:05
btw

marcor 2017-04-09 20:34:35
the assignment as a .jar file is optional for this submission

marcor 2017-04-09 20:34:44
6.OPTIONALLY a compiled distribution for easy installation/running, e.g., a jar file if you used Java

corypatterson 2017-04-09 20:34:54
@daniel I need you to merge the change i just made for the readme file

Was just reading the submission link stuff and had to add our tutor and class time

daniel 2017-04-09 20:35:09
Yeah I'll do it in like 30 min

corypatterson 2017-04-09 20:37:36
No problems

daniel 2017-04-09 20:48:30
@corypatterson can i delete the patch-1 branch?

corypatterson 2017-04-09 20:52:42
I think so, i was trying to update the readme file but I don't think I pulled right or something

marcor 2017-04-09 20:55:32
im looking into high architectural diagram

corypatterson 2017-04-09 20:56:39
If all is well I'll export the Github wiki now

daniel 2017-04-09 20:56:52
So with peer its group contribution % submitted and if we want to send individual ones we are suppo

daniel 2017-04-09 20:57:20
@corypatterson fine with me but has everyone been updating the changelog?

corypatterson 2017-04-09 20:59:49
I thought we were doing that just weekly

corypatterson 2017-04-09 21:00:06
I'll add a quick update to it now.

daniel 2017-04-09 21:00:38
i was adding what i had done weekly

corypatterson 2017-04-09 21:02:51
Ah. No worries I can fill it out a bit

daniel 2017-04-09 21:03:28
i got the built jar file working too btw, i needed to add the data folder there because of the relative lin

I got the built jar file working too btw, I needed to add the data folder there because of the relative lin CMD

corypatterson 2017-04-09 21:06:25
Oh cool, what was the problem with it?

marcor 2017-04-09 21:08:30
ok

marcor 2017-04-09 21:08:44
@daniel do you have any idea on this architectual diagram?

marcor 2017-04-09 21:09:04
i couldnt seem to find anything on it in the lectures via my quick skim

marcor 2017-04-09 21:09:41
i have found a few indications on google as to what it could be, not sure if that aligns with the assign

daniel 2017-04-09 21:13:43
yeah i dont really know what that term means but i was just thinking a flow chart that shows the user menus

daniel 2017-04-09 21:14:05
How do we feel about this for the peer review/contribution stuff

daniel 2017-04-09 21:14:06
Daniel Caddaye - s3383022. 30% overall contribution. Areas of contribution: Programming, Docume
Cory Patterson - s3600197. 30% overall contribution. Areas of contribution: Programming, Documer
Sohum Raut - s3377766. 10% overall contribution. Areas of contribution: Documenting, Design.
Marco Riotto - s3606584. 30% overall contribution. Areas of contribution: Programming, Documentir

corypatterson 2017-04-09 21:15:55
Yeah looks all good to me

daniel 2017-04-09 21:17:34
@corypatterson with the built file it was the way i was trying to run it and where the data files were b

daniel 2017-04-09 21:19:22
@corypatterson so you will make a pdf of the wiki

corypatterson 2017-04-09 21:21:31
Look, I tried cloning the wiki but that didn't work. So I was just about to copy and past each page intc know of a better way?

daniel 2017-04-09 21:21:48
well do we need to export it?

daniel 2017-04-09 21:22:57
cos its on the git if they check there. Maybe just copy past into a single pdf

corypatterson 2017-04-09 21:23:43
I guess not

corypatterson 2017-04-09 21:23:59
Yeah I'll do it just in case

daniel 2017-04-09 21:31:22
ive comited the submit materials we have already. add to there when stuff is ready

corypatterson 2017-04-09 21:31:48
OK

daniel 2017-04-09 21:32:42
it didnt sync the empty folders

daniel 2017-04-09 21:33:34
@daniel uploaded a file:

daniel 2017-04-09 21:36:05
cool thats added thanks @corypatterson

corypatterson 2017-04-09 21:41:21
No problems

Sorry I should have put it in a folder

daniel 2017-04-09 21:43:10
its all g

daniel 2017-04-09 21:45:59
so all that's left is @marcor working on the weird diagram thing and @sohum getting all the user sto
a specific format you need to use its on the assignment page on blackboard) same goes for the mee
and trello export.

corypatterson 2017-04-09 21:49:07
I guess we'll leave the rest of the stuff for @sohum

daniel 2017-04-09 21:50:41
yeah, need to wait for everything to be done before i can make the release. so ill check back in an h

marcor 2017-04-09 22:09:26
hello, i have done something with the diagram. please have look and let me know if this is right haha

marcor 2017-04-09 22:09:29
https://www.lucidchart.com/invitations/accept/14e16228-df99-4e75-91b1-a36ca66c0cf6

daniel 2017-04-09 22:20:53
Ok I'll check it out

daniel 2017-04-09 22:22:58
@marcor yeah that looks good to me. ill add it to the git

marcor 2017-04-09 22:25:02
thanks mate

marcor 2017-04-09 22:25:13
im writting up a quick doc on the tools log

marcor 2017-04-09 22:25:41
ill send u a link shortly

corypatterson 2017-04-09 22:25:55
Nice work

marcor 2017-04-09 22:32:37
https://drive.google.com/drive/folders/0B5KveK6IHfvrRHJ0UlU0TlR6UEE?usp=sharing

marcor 2017-04-09 22:32:40
hey guys

marcor 2017-04-09 22:33:47
what "Test Case management software" did we use?

marcor 2017-04-09 22:33:58
not sure on what was meant by that

corypatterson 2017-04-09 22:34:22
I think the lean testing stuff

marcor 2017-04-09 22:35:07
ohh yeah

marcor 2017-04-09 22:35:08
kk

marcor 2017-04-09 22:35:11
thanks

marcor 2017-04-09 22:40:00
ok updated

marcor 2017-04-09 22:42:43
im just putting all the meeting minutes into a single doc, ill post a link in a couple minutes. when hap
log", ill export to pdf and attach to trello docs tab for download

corypatterson 2017-04-09 22:48:59
OK except upload to the Githcontub instead

marcor 2017-04-09 22:49:24
oh yep, no worries

marcor 2017-04-09 22:50:24
btw, im not clear on who was assigned/did what on the meeting minutes

marcor 2017-04-09 22:50:27
off memory

marcor 2017-04-09 22:50:38
could you please have a quick look at this in the google doc

marcor 2017-04-09 22:50:41
cheers

marcor 2017-04-09 22:50:45

marcor 2017-04-09 22:50:58
https://docs.google.com/a/rmit.edu.au/document/d/1YqwEQfb32ikjODI-FwsICIn8w2t6Xjvq41kn1-qw(

corypatterson 2017-04-09 22:52:54
Yep looks good

corypatterson 2017-04-09 22:53:01
I'm gunna sleeps soon fellas

marcor 2017-04-09 22:53:10
ok night mate

daniel 2017-04-09 22:53:20
night

daniel 2017-04-09 22:55:31
@marcor can you give me edit access to the google doc ill helpo

marcor 2017-04-09 22:56:37
yes

marcor 2017-04-09 22:56:42
i can do that

marcor 2017-04-09 22:57:13
https://docs.google.com/a/rmit.edu.au/document/d/1YqwEQfb32ikjODI-FwsICIn8w2t6Xjvq41kn1-qw(

marcor 2017-04-09 22:57:26
edditable link

marcor 2017-04-09 23:22:51
@marcor uploaded a file: MeetingMinutesLog.pdf

marcor 2017-04-09 23:23:05
@marcor uploaded a file: DevelopmentToolsLog.pdf

daniel 2017-04-09 23:24:19
ok those are done

marcor 2017-04-09 23:25:35
My wifi is shitting itself

marcor 2017-04-09 23:25:49
I've opened a new doc for the userstories

marcor 2017-04-09 23:25:55
Just resetting the modem@

daniel 2017-04-09 23:26:05
ok

marcor 2017-04-09 23:33:06
ok back

marcor 2017-04-09 23:34:53
https://docs.google.com/a/rmit.edu.au/document/d/1H0rYX8uknNjYBQJSBcjRbvpH5VrlH0_t56QQ5\

marcor 2017-04-09 23:35:40
um, one question. where are all our stories moved to?

daniel 2017-04-09 23:36:01
they are all in done now

marcor 2017-04-09 23:37:41
haha that was silly of me, i just had to scroll down.. -_-

marcor 2017-04-09 23:57:46
ok

marcor 2017-04-09 23:57:50
user stories done

marcor 2017-04-09 23:57:58
there are only 7

marcor 2017-04-09 23:58:02
is that righ?

marcor 2017-04-09 23:59:17
exporting to pdf

daniel 2017-04-09 23:59:25
hmm yeah i think so

marcor 2017-04-09 23:59:52
@marcor uploaded a file: UserStoriesconsolidated.pdf

daniel 2017-04-10 00:00:07
sorry marco these need the prioriry and effort on them

marcor 2017-04-10 00:00:35
ahhh

marcor 2017-04-10 00:00:37
shit haha

marcor 2017-04-10 00:00:40
ok one moment

marcor 2017-04-10 00:06:11
@marcor uploaded a file: UserStoriesconsolidated.pdf

marcor 2017-04-10 00:06:17
done

marcor 2017-04-10 00:07:49
what do we have left to prep for submit?

daniel 2017-04-10 00:12:32
Its done

daniel 2017-04-10 00:13:55
@daniel uploaded a file:

marcor 2017-04-10 00:14:05
ok great work Daniel

marcor 2017-04-10 00:14:42
wait!?!!?!?!\

marcor 2017-04-10 00:14:49
did we submit a pear review

daniel 2017-04-10 00:15:03
Part A is submitted. I have attached this screenshot and the submitted materials to the trello card. G

See yall on Tuesday.

yeah its on the readme on git

marcor 2017-04-10 00:15:07
haha peer**

marcor 2017-04-10 00:15:24
ok grat

marcor 2017-04-10 00:15:28
night mate

marcor 2017-04-10 00:15:38
get some rest dungeon master 🙂

daniel 2017-04-10 00:16:02
basically we submit a % breakdown and what we did, (on readme) then if we wanted to we can ema

yes defiantly! will sleep well for sure.

sohum 2017-04-10 01:16:24
Ok, just got home. Spent the last few hours in a theatre at the art centre so my phone wouldn't work.
submission docs.

sohum 2017-04-10 01:17:28
Oh wow, you guys already did it and submitted it. That's amazing.

sohum 2017-04-10 01:24:57
I actually did a gig to 300 people which was sweet.

sohum 2017-04-10 01:25:40
I don't think there's anything left to do here tonight if it's already been submitted. I was gearing up to
on it.

sohum 2017-04-10 01:27:43
But that's really awesome. Thank you. I honestly think you guys have done an amazing job on this.

daniel 2017-04-20 17:42:54
what make up class for this can everyone make it to.

Mon 24/4 at 7pm (after the lecture) in 80.03.14
Or
Thurs 27/4 at 3.30pm--5.30pm in 80.03.10

daniel 2017-04-23 22:58:24
Well ill be going on Thursday. It will be our only meeting before its due on the 1st of may,

daniel 2017-04-23 22:58:33

daniel 2017-04-23 22:58:33

daniel 2017-04-23 22:58:33

corypatterson 2017-04-24 21:08:37
Sorry, Updated my phone and now i'm not receiving notifications for slack.

I'm fine to do the thursday with you

corypatterson 2017-04-24 21:12:38
Also i'm updating the slack with the part B stuff now

corypatterson 2017-04-24 21:14:23
it talks about a 'logging framework' for our code, do you think that means javadocs? @daniel

daniel 2017-04-24 21:21:33
Hmm yeah maybe but it could be to do with bugs and stuff. We should ask at the title

daniel 2017-04-24 21:21:42
Tute

corypatterson 2017-04-24 21:34:35
yeah for sure, btw my notifications are fixed now. so sorry about that

corypatterson 2017-04-24 21:43:14
Ok I have made some user stories for the product backlog, they need to be completed and I have as
@sohum, you get two so that the rest of us can get to work on the coding side since there is quite a
But don't worry too much, it shouldn't take each of us more than 10 mins per user story to create the

corypatterson 2017-04-24 21:44:31
If we could have those done by tomorrow evening that would be fantastic because we really need to
foresee us having difficulty with the GUI.

daniel 2017-04-25 16:57:29
there is some conflicts on the pull request *#27* @corypatterson Its the built files. Maybe clean the bu

corypatterson 2017-04-25 17:10:05
OK will do

corypatterson 2017-04-25 17:24:34
Done and merged

How do you think we will delicate the gui parts?

daniel 2017-04-25 17:26:33
Yeah im going to stat now set up the classes and that then ill add it to trello and we can delegate

corypatterson 2017-04-25 17:27:01
OK awesome :)

daniel 2017-04-25 17:28:24
@corypatterson is it ok if i del that branch

corypatterson 2017-04-25 17:52:39
Go for it

daniel 2017-04-25 17:58:04
@corypatterson can you review my pull request please

corypatterson 2017-04-25 18:00:35
Done

daniel 2017-04-25 18:04:37
Cool ive added the stat of a gui, very empty rn

corypatterson 2017-04-25 18:13:04
Ok, we are gunna use swing yeah?

daniel 2017-04-26 13:02:21
Yeah I recon

corypatterson 2017-04-26 13:11:41
OK sounds good
I'll become an expert on it then

corypatterson 2017-04-26 17:31:09
I think it would be a good idea if @marcor worked on the validation for registering that we ran out of
does else think?

marcor 2017-04-27 14:59:04
Sound cool and nice

corypatterson 2017-04-27 16:25:54
@corypatterson uploaded a file:

daniel 2017-04-28 00:30:44
to the GUI branch i had added working splash login and register. does register and login but currentl
going to a dash.

marcor 2017-04-28 13:55:55
Hey guys

marcor 2017-04-28 13:56:15
Didn't end up working on the validation last night as i said I would

marcor 2017-04-28 13:56:23
Will be on it tonight

marcor 2017-04-28 13:56:25
Sorry guys

daniel 2017-04-28 16:16:11
@marcor i've assigned a new issue on git hub to you its a bug in the user auth class

marcor 2017-04-28 18:11:02
Alright cheers

marcor 2017-04-28 18:11:28
I'll check that out

corypatterson 2017-04-28 19:26:52
I'm gunna have the GUI for the owner done by tomorrow night

daniel 2017-04-29 15:48:12
ok So i've made a pull for the GUI login register and added the factory for the bookings, i've had to u
model and user auth so please be carefull to check for merge problems. Also please update from ma

corypatterson 2017-04-29 18:01:47
OK I've reviewed that and merged, I'm going to get the owner dashboard page up and running by to
functionality complete (hopefully)

sohum 2017-04-30 03:53:30
Whoah, just saw all of this. I totally forgot to check Slack the last week.

sohum 2017-04-30 03:54:14
When is this due? Just checked the Trello and that says 3rd May but this conversation makes it soun
May? i think it said that somewhere above.

sohum 2017-04-30 03:54:27
So for me this one is just completing all the mockups?

sohum 2017-04-30 03:54:50
And broadly, that is an elaborated version of the sketches attached above.

corypatterson 2017-04-30 13:25:14
Yeah, a better version of the sketches would be helpful for submission materials

corypatterson 2017-04-30 15:25:05
@daniel I changed a couple of things around on my branch to support multiple businesses per owne
alter the save function as of yet

daniel 2017-04-30 19:07:26
@corypatterson I'm working on bookings and bus info pop up. Those changes sound good keep goi
business and dash. The owner bookings should be able to use a version of the one I'm writing for the
mockups yet and the other diagrams for submission, class and design diagrams.

corypatterson 2017-04-30 19:10:47
@daniel
I can add a new business, new employee and I'm just about done with the first pass of adding availa
I'm gunna go out soon so I won't work on it again until tomorrow night. I will push what I've done and
you can see the functionality for reals

daniel 2017-04-30 19:12:34
@corypatterson Sounds good ill have my stuff done hopefully before class tomorrow afternoon

marcor 2017-04-30 19:57:05
hey Cory, you on the line

marcor 2017-04-30 19:57:11
@corypatterson

marcor 2017-04-30 20:04:46
or anyone for that matter

corypatterson 2017-04-30 20:05:18
Nup

marcor 2017-04-30 20:06:13
haha

marcor 2017-04-30 20:06:14
thanks man

marcor 2017-04-30 20:06:24
had a few questions about the user auth

marcor 2017-04-30 20:21:48
ok, so im clearly behind the 8 ball. the suggested changes for the auth have been made, im assumir

daniel 2017-04-30 20:31:40
No I didn't, I did other stuff to the user auth to do with data access

marcor 2017-04-30 20:32:05
Ok that's good

daniel 2017-05-01 01:07:40
customer add/remove booking works. PR sent ill work on finishing the customer dash by end of Mon

The customer dash and bookings part doesn't yet support the slots and services. Backend for those customer dash tomorrow early ill start on adding those in.

corypatterson 2017-05-01 07:58:12
OK cool, We can discuss more after the mid sem

sohum 2017-05-01 12:19:11
When is this due?

daniel 2017-05-01 12:52:09
9am Wednesday

sohum 2017-05-01 13:21:04
Ok sweet, there's still a few days.

corypatterson 2017-05-01 14:01:15
@sohum

We cool to have a quick meeting after the mid semester test today?

sohum 2017-05-01 14:01:36
Yep, I'll be there.

daniel 2017-05-01 14:01:55
👍:skin-tone-2:

daniel 2017-05-01 14:01:55
👍:skin-tone-2:

corypatterson 2017-05-01 14:04:13
OK sweet

sohum 2017-05-01 16:45:31
Where do we meet after the lecture?

corypatterson 2017-05-01 16:46:54
Meet at the entrance to the lecture hall

marcor 2017-05-01 16:47:12
Cool beans

corypatterson 2017-05-01 20:18:38
I've added a card for @sohum in the 'working on now' list. Please add any other things I've forgotten

daniel 2017-05-01 20:26:19
@corypatterson can you look at the bookings pull request, i want to pull the dialog part but its depen

daniel 2017-05-01 20:28:23
@corypatterson also those old branches of yours if they are unneeded can you delete them

corypatterson 2017-05-01 20:29:30
Yep
I'll get on it now

corypatterson 2017-05-01 20:33:04
OK that's merged now, I'll delete the branches once I get on my pc. On the train home still

daniel 2017-05-01 20:33:16
Ah ok no stress

corypatterson 2017-05-01 21:39:35
@sohum i've added your checklist card on trello, please aim to get that done before our class tomor
till the last minute

daniel 2017-05-01 23:32:46
Customer dash is done, ill start work on fixing up some display and formatting issues for the GUI in
splash/login.register/customer half.

marcor 2017-05-02 03:08:38
hey guys

marcor 2017-05-02 03:08:45
i have finished up all the validation

marcor 2017-05-02 03:08:55
i think its working

marcor 2017-05-02 03:09:23
i have tested it with the test junit we had setup for it

marcor 2017-05-02 03:09:46
and it has passed everything i could think to throw at it

marcor 2017-05-02 03:11:09
as @corypatterson is currently aware there were some issues with uploading to git. so what would y
the best way to integrate my changes to userAuth class?

marcor 2017-05-02 03:11:09
as @corypatterson is currently aware there were some issues with uploading to git. so what would y
the best way to integrate my changes to userAuth class?

marcor 2017-05-02 03:23:19
@marcor uploaded a file: UserAuth.rtf

daniel 2017-05-02 08:54:32
I can sync it for you

daniel 2017-05-02 08:59:02
done. 🙂

corypatterson 2017-05-02 10:08:48
Oh by the way I've completed the owner dashboard functionality wise but tonight I'm going to go ove
be more in line with the rest of the program and also will be adding the letter to all of the owner dash

marcor 2017-05-02 21:45:12
alright

corypatterson 2017-05-02 21:48:14
I've added the meeting minutes for this week

Also just reiterating that the participation will be 15% for @sohum and the rest split equally between
in tonight's meeting

marcor 2017-05-02 21:48:34
ive just arrived home, im going to post up my validation shiz with the updated changes to check if va

marcor 2017-05-02 21:48:59
if one of you could kindly sync 🙂

marcor 2017-05-02 21:49:20
and ye @corypatterson thank you

marcor 2017-05-02 21:49:54
@daniel or @corypatterson what was the diagram i am working on now? ive completly blanked

daniel 2017-05-02 21:50:21
Class

corypatterson 2017-05-02 21:54:03
^^yep

marcor 2017-05-02 21:56:17
awesome cheers

marcor 2017-05-02 22:07:09
@marcor uploaded a file: UserAuth.rtf and commented: updated to check for empty entries with ".isE

daniel 2017-05-02 22:15:06
ok ill add this in now

daniel 2017-05-02 22:28:32
done

daniel 2017-05-02 22:39:48
Ive done some bug fixing and tidy up i wanted to, i've also added javadocs an marcos changes ill ma

daniel 2017-05-02 22:48:13
ive updated trello with more info on documentation

corypatterson 2017-05-02 22:58:22

no problems, i'll get on it now

daniel 2017-05-02 23:28:35
Ive added some of the submit stuff, and updated read me. Im going to merge that branch now also

corypatterson 2017-05-02 23:32:01
I've just finished adding the logging and fixed the two bugs assigned to me. I'll leave the Owner Dasl
but it's all working fine now. I'll start the pull request and move on to doing the rest of the documenta

daniel 2017-05-02 23:33:16
I figured out a nice way to display the form for login/register. Looks very nice now

daniel 2017-05-02 23:42:57
java doc and built app are ready for submit now

corypatterson 2017-05-02 23:49:30
sick, also i've converted the meeting minutes from part B meetings into a seperate pdf and created a
to the master

daniel 2017-05-02 23:50:22
merged

corypatterson 2017-05-02 23:52:13
cheers

daniel 2017-05-02 23:52:38
So should i unlock the master branch?

corypatterson 2017-05-02 23:52:57
@sohum are you home to upload the mockups now?

corypatterson 2017-05-02 23:53:39
unlock for sohum to add his stuff?

daniel 2017-05-02 23:54:29
yeah but he then has to do a release on git also and then submit on blackboard

daniel 2017-05-02 23:54:46
i would prefer to do it tonight

marcor 2017-05-02 23:56:08
agreed

corypatterson 2017-05-02 23:56:08
do you think it would be ok to leave out the mockups?

daniel 2017-05-02 23:57:35
depends if they will only look at whats submitted or what, but even if they look at git they will be look

corypatterson 2017-05-02 23:58:24
i'm down for whatever

daniel 2017-05-02 23:58:29
Ill be up for another hour or so still

corypatterson 2017-05-02 23:58:48
we should probs turn the user stories into pdf's now though

daniel 2017-05-02 23:59:30
sure

corypatterson 2017-05-03 00:00:12
I guess we wait until we've done that and marcor is happy with the class diagram and if @sohum isn
without the mockups

daniel 2017-05-03 00:00:50
well ill wait until i go to bed for the submission

corypatterson 2017-05-03 00:01:28
ok no worries, marcor should be done in the next 15 mins with the diagram

daniel 2017-05-03 00:01:32
@corypatterson set up a shared google doc and we can work on user stories at the same time

corypatterson 2017-05-03 00:01:42
sick sounds good to me

corypatterson 2017-05-03 00:02:49
@daniel where do i find the share link?

daniel 2017-05-03 00:03:26
top right somewhere i think

corypatterson 2017-05-03 00:06:46
on trello?

daniel 2017-05-03 00:06:59
https://docs.google.com/a/rmit.edu.au/document/d/1H0rYX8uknNjYBQJSBcjRbvpH5VrlH0_t56QQ5

corypatterson 2017-05-03 00:07:22
ok thanks haha, sorry i'm not great at findin gthings

daniel 2017-05-03 00:07:30
found marcos old one

corypatterson 2017-05-03 00:08:26
sweet

marcor 2017-05-03 00:17:58
n-n-n-nice

daniel 2017-05-03 00:18:05
User stories are updated and commited

marcor 2017-05-03 00:18:35
i got 5-10 left on class diagram

marcor 2017-05-03 00:18:41
mins

daniel 2017-05-03 00:39:44
Is the lucid chart lagging out for you also

corypatterson 2017-05-03 00:53:32
it is for marco haha

corypatterson 2017-05-03 00:54:36
should we add the relationship lines and multiplicities?

daniel 2017-05-03 00:55:31
I dont think so

corypatterson 2017-05-03 00:56:39
ok well i think that's detailed enough then

daniel 2017-05-03 00:57:00
yep

daniel 2017-05-03 00:57:29
somone pdf that shiz

marcor 2017-05-03 00:57:34
hahaha

marcor 2017-05-03 00:57:39
alright im on it

corypatterson 2017-05-03 01:04:54
you bet me to it @daniel

marcor 2017-05-03 01:05:52
mockups?

daniel 2017-05-03 01:06:01
hahahaahahah!!!!!!!!!

marcor 2017-05-03 01:06:04
those golden tendie mockups?

corypatterson 2017-05-03 01:06:58
we will just have to add the mockups in the part C submission

daniel 2017-05-03 01:08:14
so perhaps we release and submit and when @sohum is on and done with mock ups he can resubm
adding them to the local zip. It would be fine but they just wont be on the git or release.

marcor 2017-05-03 01:08:48
lets go ahead with that

corypatterson 2017-05-03 01:08:54
yeah that's fine. lets do it

daniel 2017-05-03 01:09:53
we officially have a 1.0 release

corypatterson 2017-05-03 01:10:30
now we can put it on the market yeah

corypatterson 2017-05-03 01:10:59
50$ per business with 5$ per every employee added?

corypatterson 2017-05-03 01:12:10
all right, if is happy it's bedtime for me

daniel 2017-05-03 01:15:56
yes im just submitting now

daniel 2017-05-03 01:18:54
done

marcor 2017-05-03 01:19:43
nice

corypatterson 2017-05-03 01:19:56
Beauty

Everyone sleep easy, and congrats to all of us for completing part B

marcor 2017-05-03 01:20:08

sohum 2017-05-03 03:30:23
I'm here guys. Sorry it ended up going a lot later than I expected. I'll have everything zipped and sub

sohum 2017-05-03 05:49:09
Done and submitted.

sohum 2017-05-03 05:49:55
@sohum uploaded a file:

sohum 2017-05-03 05:51:09
I also read through the readme and really appreciate you guys distributing the peer review as a 16%
been the best in this subject, and very honestly I think most of it have been beyond my technical abil
pass this course. So thank you.

sohum 2017-05-03 05:56:28
I'd honestly be extremely happy with just a pass for this subject if I can manage it, a lot of the concep
my head, and I don't think it effects your grade very much (will always get a super high grade) but it l
pass me or destroy my grade entirely.

sohum 2017-05-03 05:56:33
Because I think they're just taking your grade and then whatever mine is as a percentage of yours a
if my contribution percentage is less than half of yours, it's an automatic fail. Like 10% is 1/3rd of 30
90% for you guys turned into a grade of 30% for me.

sohum 2017-05-03 05:57:46
So I really appreciate the current percentages. I will try really hard for assignment 3 as well.

marcor 2017-05-09 18:17:26

Hi guys,
I have to apologise as to not turning up today. I had a long day at work, and not even realising hoppe
just got home 🙁

daniel 2017-05-10 13:50:10
All g we got the marks anyway

corypatterson 2017-05-10 13:51:29
Hey

I've added some stuff for us to work on for part c
If anyone else can think of anything throw it up there as well

marcor 2017-05-10 13:52:15
Thanks champ

sohum 2017-05-12 03:13:37
I have a favour. Can you please add a Trello card outlining everything I need to do for Part C? I'm go
on this one to try and get an equal contribution percentage for the final grade.

sohum 2017-05-12 03:15:02
Ideally I'd like to try and get to 25% / 25% contribution. I think I'll still struggle with a lot of the coding
absolute worst case scenario I need to get to a 19% / 27% contribution split.

sohum 2017-05-12 03:15:03
Any less than that and I don't think I can pass the course.

sohum 2017-05-12 03:15:45
Because assignment 1 was worth 15%, assignment 2 was only worth 10% and so I'm currently sittin

sohum 2017-05-12 03:16:14
The assignment 3 is worth 15%, so that has to make up for the first one to be sitting on an overall pa

sohum 2017-05-12 03:16:57
I've got 2 assignments due on Tuesday. But post Tuesday I'm going to try and focus most of my atte

sohum 2017-05-12 03:18:50
Like a 19% / 27% split is the lowest I can get and still pass the course. So if everything I need to do
can keep it in my headspace and think about it then give it a start once the other assignments are d

daniel 2017-05-16 01:13:27
@sohum The programming parts that Mohammad are already on trello, i tagged you in the meeting
it mentions it too. Additionally its between you and him as to whats required.

Also remember that the system is due Monday the 22nd, so for you thats whatever programming pa
a couple of unrelated things we were going to add and tidy up.

The Monday after (29th) is when the documentation/video/materials is due and we will have todays t
on the planning/devision of that stuff.

if i were you i would focus on the programming requirements Mohammad set for you and if your uns
tute this week for submission on the 22nd. I will help you with git merging and milestone the git for th
night.

corypatterson 2017-05-16 17:35:56
Anyone else coming to today's class?

sohum 2017-05-17 13:44:14
Got it. I'm starting on the cards now.

sohum 2017-05-17 13:44:24
As discussed in class, I'll have these done by Sunday.

sohum 2017-05-17 13:45:05
As we agreed with Mohammad, if I get these done that will be a 30% contribution for the assignment
up.

sohum 2017-05-17 13:45:15
I'm pretty much going to be doing just this until the weekend.

corypatterson 2017-05-17 14:58:46
30%?
I thought we agreed that if you get your stuff done then we will all get an equal 25% contribution. Unl

I thought we agreed that if you get your stuff done then we will all get an equal 25% contribution. Or still get 25% but you get 30% which will add up to 105% total?

daniel 2017-05-17 22:30:01
Mohammad we can decide and discussions the peer review on Tuesday after submission

corypatterson 2017-05-17 23:16:06
Sounds good to me

daniel 2017-05-17 23:25:51
So as i said before i have updated the loggers that exist to write to file, ensure future ones are gettin will also.

And ive done alot but not all of the commenting and javadocs updates. All but view are done and sor ones in the model for format etc.

daniel 2017-05-17 23:36:51
ive now updated all view except the owner classes, ill leave those because i know @corypatterson y them anyway

corypatterson 2017-05-18 09:29:18
Very good sir, I shall get onto that when time permits

sohum 2017-05-18 15:53:53
I have a question.

sohum 2017-05-18 15:54:56
In the user story I'm working on, with user story 1, i don't understand what it means by "the length of project, the booking appointment have data, time and length.

sohum 2017-05-18 15:55:13
And in user story 2, i don't understand what "time avilable for the type of appointment" means.

sohum 2017-05-18 15:55:21
Can you guys please explain this in more detail?

sohum 2017-05-18 16:03:59
If you guys could get back to me ASAP. That would be amazing.

sohum 2017-05-18 16:04:04
I'm looking at it now.

sohum 2017-05-18 16:04:45
These are the two user stories I'm talking about:

sohum 2017-05-18 16:05:19
"User story 1: I want users to be able to book appointments based on different lengths of time so tha book out my employees full day

"User story 2: Given that a customer logs in with the correct details and they select a type of appoint time available for the type of appointment then the appointment can be booked."

sohum 2017-05-18 16:06:58

So questions are:

1. What does it mean by "length of time" what increments should this be in?

2. What does it mean "time available for the type of appointment"? What would the application be feature?

corypatterson 2017-05-18 16:17:28
We are going to make a length of time called a block
They will go for 30 mins each

So your appointment will have to take up an amount of blocks which = the amount of time

sohum 2017-05-18 16:54:31
Ok question then

sohum 2017-05-18 16:54:59
In the customer dashboard, a customer can select the booking from that business register.
But how do you select appointment type? How does a customer select appointment type?

sohum 2017-05-18 16:58:38
I think I'm getting confused here.

sohum 2017-05-18 16:59:02
Is the "appointment type" different from the "length of appointment"?

corypatterson 2017-05-18 17:06:30
You will have to add the selection of booking type
And the two things are directly related so kinda

sohum 2017-05-18 17:09:03
But what is the appointment type?

sohum 2017-05-18 17:09:09
Can you give me an example?

sohum 2017-05-18 17:09:28
Like what should the selections be? And say?

sohum 2017-05-18 17:10:39
Like a person chooses length of appointment, that's straightforward. It's just blocks of time. Then the
appointment, but what are they selecting here? What is meant by type of appointment?

daniel 2017-05-18 19:04:18
It's on the assignment sheets for Part c I think but basically there are types of appointments or servic
length, so a haircut might be 1 block but a hair colour might be 2. All of that is what your implementir

daniel 2017-05-18 19:04:51
No part b actually

corypatterson 2017-05-18 19:13:46
You are making the appointment type

The business owner should be able to add an appointment type which takes up a certain amount of

corypatterson 2017-05-18 19:13:53
Sorry my message never sent

sohum 2017-05-19 00:47:38
Ok, so an appointment type is essentially an appointment which takes up multiple blocks and the ab
blocks, with a check to see if booking that many blocks is possible.

sohum 2017-05-19 15:50:13
I noticed that the LoggerUpdate branch has a more recent updates than the master. Should I branch
the master?

sohum 2017-05-19 15:51:08
Can someone please merge that into Master so that when I branch out from it, I have the most upto
pull my changes back to Master we don't have a collission if we're editing the same files.

sohum 2017-05-19 15:54:49
And my push doesn't override changes made by other people when they're both merged.

sohum 2017-05-19 15:55:54
This branch (comments update) is 4 commits ahead of master.

sohum 2017-05-19 15:56:09
This branch (logger Update) is 2 commits ahead of master.

sohum 2017-05-19 15:57:50
Yeah, literally some of the same files I've been editing I just looked at the other branches, they have

days ago.

sohum 2017-05-19 15:57:59
But my branch is still running off master.

sohum 2017-05-19 15:58:22
I'm pretty sure that means when I commit it, and the other branches as well as this branch are all me
They're going to create conflicts.

sohum 2017-05-19 15:58:32
And override data somewhere.

sohum 2017-05-19 15:58:37
But I can commit it anyway?

sohum 2017-05-19 16:07:10
Yeah, branch protection is such a useful feature. I actually love it.

sohum 2017-05-19 16:08:43
I think that's one of the most important things I've learned in this course. I don't think I will ever work
without branch protection.

corypatterson 2017-05-19 18:16:55
You should be able to merge that branch into yours

sohum 2017-05-20 16:01:21
I've done it.

sohum 2017-05-20 16:01:29
It's apparently waiting for review and approval.

daniel 2017-05-20 17:56:25
Ok Ill get on now and have a look at the PRs

daniel 2017-05-20 18:03:16
I have reviewed the pull request and made some comments. Check it out on the GIT

daniel 2017-05-20 18:03:22
@sohum

sohum 2017-05-20 18:08:19
I've just looked at it but I don't fully understand them.

sohum 2017-05-20 18:08:20
@s3383022 requested changes on this pull request.

Data files need to be updated to new format.
Slot set up but service types not.

sohum 2017-05-20 18:08:52
Can you please explain super specifically (with instructions and examples would be helpful) what yo
comments?

sohum 2017-05-20 18:09:28
What is service type? What is this supposed to display? I thought the appointment type was just the
appointment takes up.

sohum 2017-05-20 18:09:43
What is the new format for the data files and how should I do this?

sohum 2017-05-20 18:10:35
Also, can you merge my pull request back into Master and then I will create a new branch to add the
in the comments.

sohum 2017-05-20 18:10:47
I'd like to as much as possible be working on an updated version.

sohum 2017-05-20 18:11:25
So can you merge it with Master and then I will create a new branch to work on.

sohum 2017-05-20 18:11:47
But I don't fully understand what I'm required to do exact.

daniel 2017-05-20 18:16:45
So i've already merged the other PRs into master, so you could update your branch from master witl

don't effect what your doing.

You changed how the data is read and written in the files, to store the number of blocks, so you need
have that info otherwise its trying to read info that isn't there. The app currently crashes.

The services and blocks are two parts of the one thing. Each type will have a standard number of bl
might always use 3 blocks. Currently you have the blocks part done but not the setup of how that tra

Im happy to merge just the blocks part if you get the data stuff fixed. Then you can work on the servi

sohum 2017-05-20 18:21:00
But isn't this an all purpose appointment booking system? So what I mean is, a dentist and a hairdre
them have anything in common in terms of service type. But both may go for 2 hours (4 blocks). Botl
block appointment. But they don't have anything to choose from regarding service type? So isn't that
I honestly don't even know how it would work exactly. Like what would the business owner add, and
select.

sohum 2017-05-20 18:21:10
Ok, with the data thing I'll start on that.

sohum 2017-05-20 18:22:12
I don't think the service type was on the Trello card.

sohum 2017-05-20 18:26:20
Like there are practically infinite service types because there are practically infinite businesses.

sohum 2017-05-20 18:27:15
A dentist could have a route canal, a teeth cleaning, tooth extraction, tooth surgery, etc etc. While a l
haircut, hair extentions, hair colouring, hair styling etc etc. And those are only 2 types of businesses.

sohum 2017-05-20 18:27:33
How do you even implement that?

sohum 2017-05-20 18:27:55
I thought that was implicitly covered by booking the length of appointment.

sohum 2017-05-20 18:28:07
You can book for 2 blocks of time or 4 blocks of time.

sohum 2017-05-20 18:29:16
That makes sense to me. But booking for blocks of time AND THEN also selecting what service you
complicated. As the number of services is potentially endless, as is the number of businesses which
services.

sohum 2017-05-20 18:29:20
Does that make sense?

sohum 2017-05-20 18:29:33
I will implement the fix for the data files.

daniel 2017-05-20 18:30:22
Yeah it's not hard coded types, the owner sets that info when they setup business.

sohum 2017-05-20 18:30:34
But I'm not sure the service type is needed. I think it adds more complexity than it does usefulness. A

daniel 2017-05-20 18:30:58
It's in the assignment specs and it is

sohum 2017-05-20 18:31:55
"I want users to be able to book appointments based on different lengths of time so that i can more a
employees full day

Given that a customer logs in with the correct details

and they select a type of appointment
and there is enough time available for the type of appointment
then the appointment can be booked

Given that the user logs in with the correct details
and they select an appointment type
but there isn't enough time for that type
reject the booking"

sohum 2017-05-20 18:32:43
There's nothing there about service types.

sohum 2017-05-20 18:32:57
Umm, I can try to add service types but I honestly don't know how.

daniel 2017-05-20 18:33:07
a user can book a specific type of appointment P: low E: 5

sohum 2017-05-20 18:33:49
Yeah that's the card I pulled the user stories from.

daniel 2017-05-20 18:40:39
But again I don't care about the cards I told you to do the user stories for this yourself and that it was
ignoring the fact that Cory and I both told you on slack and in person how it's supposed to work.

Mohumad is the product owner and he set it this way during the discussions with him.

Do the slot fix first.

The blocks are infered from the type. The owner sets up a type for their business with a service nam
stoted. Then when the customer books they pick a service type and thus the length in blocks is taker

There is heaps of ways to implement this feature that's why the user stories are very high level. It's r
you implement it. But again I told you to check and write the needed user stories for this 3 weeks ag
taged you in the one there because it does cover this feature.

sohum 2017-05-20 18:46:03
Yeah I didn't really understand. Evidenced by me repeatedly saying, I don't understand this bit, pleas
And above in Slack, what I genuinely thought it was was the number of blocks in an appointment is t
is implemented.

And no, in class I explicitly confirmed with you guys. If I complete the card that is currently on Trello
Would result in the 30% contribution. That was the last thing. There wasn't any further instructions.

sohum 2017-05-20 18:46:18
BUT..;. I will try to implement these new service types.

sohum 2017-05-20 18:48:54
I will let you know tomorrow if I'm successful at it.

sohum 2017-05-20 18:49:15
And will do the slot fix now.

sohum 2017-05-20 18:50:19
I don't fully know how to do it. But I will work on it and try and figure it out.

daniel 2017-05-20 18:50:34
The number of blocks can represent appointment types, that's fine but where is that? Its just a numb
code are they translated into types? The user doens't know that x number of blocks = this service.

And no that i'snt how it went.
You have an agreement with Muhammad that you will pass if you implement the services feature as
specs. He is the product owner and its as stated bellow. Its between you and him.

@sohum The programming parts that Mohammad are already on trello, i tagged you in the meeting
it mentions it too. Additionally its between you and him as to whats required.

Also remember that the system is due Monday the 22nd, so for you thats whatever programming pa
a couple of unrelated things we were going to add and tidy up.

The Monday after (29th) is when the documentation/video/materials is due and we will have todays t
on the planning/devision of that stuff.

if i were you i would focus on the programming requirements Mohammad set for you and if your uns
tute this week for submission on the 22nd. I will help you with git merging and milestone the git for th
night.

daniel 2017-05-20 18:52:09
our, marco, cory and my understanding of services is how i described it to you, and you have started
complete.

daniel 2017-05-20 18:53:28
You need to add in the owner function to set them up and store them, then a function to translate the
services, I've already done how those display in the factory.

sohum 2017-05-20 18:53:31
Ok, I will try and complete it by tomorrow.

sohum 2017-05-20 18:55:38
Man, trying to work on a codebase when you don't know the programming language is so difficult. D
is just like a maze.

sohum 2017-05-20 18:57:19
I will try. I did not fully understand that was the requirement until just now.

daniel 2017-05-20 18:57:53
We each figured out how to implement the sections we completed ourselves, that's the entire point.
I didn't in the past describe exactly how you should do this feature for this reason.

Yes user stories are a industry standard and are designed for non programmers.
Learning how to turn that into code can be hard but thats the skill the course develops.

sohum 2017-05-20 18:59:13
Having studied Java though. Next time we do a PHP codebase.

corypatterson 2017-05-20 19:00:14
Next time for sure

sohum 2017-05-21 14:40:29
Ok, I've committed the updates. I don't know how to make the pull request though. As the pull reque
further pull requests from my end

further pull requests from my end.

sohum 2017-05-21 14:40:39
I don't know how to fix that.

sohum 2017-05-21 14:43:37
I think you have to approve and merge it.

sohum 2017-05-21 14:48:48
I'm going to be unavailable from 7pm tonight, a really good friend is leaving for good to Belgium. So
completed and merged before then

sohum 2017-05-21 14:49:04
if someone can please look at this asap

daniel 2017-05-21 16:50:01
It crashes because the data files haven't been updated yet.

sohum 2017-05-21 16:51:59
I thought I did?

daniel 2017-05-21 16:52:07
@daniel uploaded a file:
daniel 2017-05-21 16:52:18
It could be that you did but its not commited to git.

daniel 2017-05-21 16:53:19
@daniel uploaded a file: and commented: Files in the branch

sohum 2017-05-21 16:58:29
Can you explain specifically what you mean by update the data files?

sohum 2017-05-21 16:58:47
Which file are you referring to?

sohum 2017-05-21 16:59:34
I'll recheck my local copy and see.

sohum 2017-05-21 16:59:57
Is it just doing that because the bookings haven't been added? So there is no data running in the app

sohum 2017-05-21 17:12:27
By Data File do you mean the customerinfo.txt and businessinfo.txt?

sohum 2017-05-21 17:12:38
So it's working correctly, it's just mishandling the data files?

sohum 2017-05-21 17:15:06
Ok I've just updated those files.

sohum 2017-05-21 17:15:11
Can you please check now?

sohum 2017-05-21 17:16:55
@daniel

sohum 2017-05-21 17:35:03
I think I really hate that about Java. An app actually crashes and stops running altogether. I don't thin
PHP on a server. It runs, it just may not run correctly.

sohum 2017-05-21 17:36:04
Branch protection was such a smart idea.

sohum 2017-05-21 17:37:51
Ok, the data files are updated now to show the blocks.

daniel 2017-05-21 17:44:05
It runs so ill merge it but i won't be doing any testing.

If your done ill do a release and submit it when i get home this evening.

@corypatterson didnt you want to update the owner dash?

sohum 2017-05-21 17:44:51

sohum 2017-05-21 17:44:54
I'm done yes.

sohum 2017-05-21 17:45:10
Please merge it.

sohum 2017-05-21 17:45:42
Sorry it took so long to figure out what the problem was.

sohum 2017-05-21 17:45:48
I'm still wrapping my head around this fully.

sohum 2017-05-21 17:46:12
But yes, I'm done. I think that's the trello card completed.

sohum 2017-05-21 17:46:32
I miss databases.

sohum 2017-05-21 17:50:16
Ok, I've spoken to Mohammad and he said that the contribution percentage for this assignment wou
my grade from the first assignment.

sohum 2017-05-21 17:50:35
So it won't effect any of your grades at all but will pull mine up.

sohum 2017-05-21 17:51:12
As whatever the grades above 100% are, will turn into bonus points for the previous fails.

sohum 2017-05-21 17:52:01
I would really like in the submission if the contribution percentages could be 40% / 20%. I've worked
week.

sohum 2017-05-21 17:52:44
If you guys are ok with that. It won't affect your grades at all. But will lift mine up. So I would really ap

sohum 2017-05-21 17:53:26
And my god, I totally understand what you meant by when a card says it'll take 3 hours and then acc
hours. OMG.

corypatterson 2017-05-21 17:54:23
Yeah I'll just finish up my cleanup

sohum 2017-05-21 17:54:33
It genuinely feels like my entire week went in learning the necessary Java and getting the understan
around the usecase of the app. And just trial and erroring my way through it.

sohum 2017-05-21 17:55:06
And hitting wall after wall. I'm so happy it works correctly.

sohum 2017-05-21 17:59:32
I also want to thank you guys for being really patient with me during the course. I know it can be frus
concept over and over again. But thank you for doing that anyway. I've genuinely found this course t

sohum 2017-05-21 18:00:27
Even the understanding of how a Java app is put together is something that is all new to me. So thar

sohum 2017-05-21 18:00:45
And "getting" the concepts.

daniel 2017-05-21 22:24:58

I have submitted and updated trello. Obviously any changes from now until 9am tomorrow then you

@sohum the demo for your stuff is Tuesday obviously and after that we can talk about the final docu
not heaps so im not worried about that.

corypatterson 2017-05-21 22:59:38
Cool

sohum 2017-05-21 23:21:25
Cool cool.

sohum 2017-05-21 23:21:34
Just create cards for anything else I need to do re submission.

sohum 2017-05-23 16:15:04
Hey guys, I actually won't be able to come into class today. I've just missed my previous class too. I'v
Application Development assignment due tonight at midnight and it's worth 40% of my grade. Literal

sohum 2017-05-23 16:15:09
Due Date: A final submission before 23rd May 11:59pm

daniel 2017-05-24 02:13:35
@corypatterson @marcor

That run error we had during demo, its some stupid thing that happens when you try and run an exte
Works fine when run via explorer or the eclipse run thing.

daniel 2017-05-24 15:23:23
@sohum hey sohum we have some free time this afternoon and we are working on the video, we we
you a script for some voice over on the video. If your around uni now let us know otherwise Marco w
sometime.

sohum 2017-05-24 18:29:20
Oh damn, sorry guys.

sohum 2017-05-24 18:29:35
If you could please send me the script? I can record it at home.

corypatterson 2017-05-24 18:42:32
All good
Marco will send it through soon I'm pretty sure

marcor 2017-05-25 12:17:30
hey @sohum

marcor 2017-05-25 12:17:40
i have a lil script together for you:

marcor 2017-05-25 12:17:42
"Hello and welcome to the ABS system. I'm Troy McClure and today we will be sharing the latest and

sohum 2017-05-25 18:21:49
Hey, I don't know if I can get it to you by 6pm today as it's after 6 and I just got it. But I'll record them
email you the sound files soon.

sohum 2017-05-25 18:21:59
What's your email address? @marcor

sohum 2017-05-25 18:22:17
I also checked my blackboard and we received an 8.4 out of 10 for Assignment 2

marcor 2017-05-25 18:22:55
s3606584@student.rmit.edu.au

marcor 2017-05-25 18:23:03
Not sure if the s is on emails though

marcor 2017-05-25 18:23:19
Just throw them up on the drive and send a shareable link here buddy

sohum 2017-05-25 18:33:01
Sure thing. Will get on it soon.

sohum 2017-05-25 18:33:23
Do you want it as lots of little files? Or one big file with all of the parts of the script?

sohum 2017-05-25 18:33:43
I'll name them like 1, 2, 3 etc which correspond to the various lines you've drawn when sending the s

sohum 2017-05-26 02:25:06
Can you please confirm how you want these files? Lots of tiny ones or one big one?

sohum 2017-05-26 02:25:12
It matters for how I record them.

sohum 2017-05-26 02:25:15
@marcor

sohum 2017-05-26 15:06:36
Dude, can you please confirm on this ASAP so I can start on this?

daniel 2017-05-26 15:55:21
Just do it as one he can cut it up

marcor 2017-05-26 16:13:46
Dude

marcor 2017-05-26 16:13:49
Just record it

marcor 2017-05-26 16:13:53
It really doesn't matter

marcor 2017-05-26 16:14:21
It's probably easier to record it in seperate files

marcor 2017-05-26 16:14:37
So that uowas don't mash them all together and they are hard to cut up later

marcor 2017-05-26 16:14:51
So that you* don't

marcor 2017-05-26 19:14:57
So have you got it done my man

marcor 2017-05-26 19:15:02
@sohum

daniel 2017-05-26 19:39:25
Also we still have lots of documentation to update and prepare.

Note: I am unavailable all of Sunday.

I have done the release notes, updated javadocs, built app, and updated some parts of the wiki.

Look at the checklist on trello and i would like to have it all done my Saturday night.

corypatterson 2017-05-26 19:46:31
I'm free tomorrow afternoon so I'll do some then :)

daniel 2017-05-26 19:57:51
@corypatterson could update the wiki usage section

corypatterson 2017-05-26 20:05:50
Sure can

sohum 2017-05-27 03:55:32
It's done.

sohum 2017-05-27 03:55:47
Sorry just looked at this. Was at a musical beforehand.

sohum 2017-05-27 03:56:36
Had a class till 4:30 then was at a show by 5:30, dinner, date, drinks etc.

sohum 2017-05-27 03:56:48
It's zipped and attached here.

sohum 2017-05-27 03:57:33
Ok, I thought you'd want lots of little sound bites but wanted confirmation first. In case you were just
sound bite. Wasn't sure how you wanted this.

sohum 2017-05-27 03:58:14
I've recorded it as lots of little ones. Starting from 8, it counts up with each increment correlating to th
of script items you've written.

sohum 2017-05-27 04:00:01
Like either turning lots of little sound files into one big sound file, or converting one big sound file into
add hours of work, so I wanted clarification.

sohum 2017-05-27 04:00:27
If that makes sense. It's a problem I see all the time in theatre and standup comedy. A field I used to

sohum 2017-05-27 04:00:31
Anyway, attached is the files.

sohum 2017-05-27 04:00:52
@sohum uploaded a file:

sohum 2017-05-27 04:01:32
I also have a major assignment due worth 50% for a Leadership and Management class which is a 4
midnight on Sunday so I'm unfortunately not going to be very helpful beyond this this weekend.

sohum 2017-05-27 04:03:13
But I think I've completed most of the items for this assignment. I submitted all the Github stuff last w

sohum 2017-05-27 04:03:45
Just confirming, with the contribution percentages, you guys are going with the deal Mohammad was

sohum 2017-05-27 04:04:31
The 40% / 20% / 20% / 20% contribution split.

sohum 2017-05-27 04:04:48
Your grade doesn't get affected at all, but whatever the contribution percentage is lifts my grade. Wa
about.

sohum 2017-05-27 04:05:07
Are you guys cool with that?

daniel 2017-05-27 15:22:20
We didn't he said he would figure it out himself.

corypatterson 2017-05-27 15:24:29
Mohommed told us to give us three a percentage mark out of 100 and that he will work out what to g
something

daniel 2017-05-28 20:41:06
Ok im back now. Hows it all going?

daniel 2017-05-28 20:41:13

corypatterson 2017-05-28 20:41:55
Post mortem report is done, I think. Just turning the commits into a changelog now

daniel 2017-05-28 20:42:15
ok cool when you done with that ill make it into the user manual

daniel 2017-05-28 20:44:16
Post Mortem looks good 🙂

corypatterson 2017-05-28 20:44:41
OK cool, did the usage instructions need updating?

daniel 2017-05-28 20:44:56
Yeah just the last two sections tho

daniel 2017-05-28 20:45:33
hmm actually most of it needs updating ill start that no

daniel 2017-05-28 20:45:34
now

corypatterson 2017-05-28 20:57:10
If you want I can do it, you seem to have done a lot already

daniel 2017-05-28 20:57:39
Ill do the customer parts, Ill let you know when im done

corypatterson 2017-05-28 20:59:53
OK cool

daniel 2017-05-28 21:00:13
Ready

daniel 2017-05-28 21:18:12
@marcor Do we have a movie file i can upload too?

daniel 2017-05-28 21:18:19
Changelog looks good

daniel 2017-05-28 21:19:28
@corypatterson with the report do we need to do the table at the end?

marcor 2017-05-28 21:20:17
not sure what you mean man? do you have some extra things to ad to the movie?

daniel 2017-05-28 21:20:45
nah its all good saw your message on trello

marcor 2017-05-28 21:20:57
yep yep, i just gotcha too

corypatterson 2017-05-28 21:23:28
I don't know, it was there when i started. Was i meant to fill it out or nah?

corypatterson 2017-05-28 21:23:43
@daniel

daniel 2017-05-28 21:26:49
fill it

corypatterson 2017-05-28 21:27:20
ok, i'll just underline and make bold the selection

daniel 2017-05-28 21:36:45
Ok i have finished styling the report

corypatterson 2017-05-28 21:42:44
ok cool. i'm just finishin gup on the owner usage

corypatterson 2017-05-28 21:42:58
finishing up*

marcor 2017-05-28 21:44:28
gup

daniel 2017-05-28 21:45:17
gup?

corypatterson 2017-05-28 21:45:23
owner usage complete

corypatterson 2017-05-28 21:45:35
gup

corypatterson 2017-05-28 21:45:58
i made one mistake and Marco is capitalizing on it

daniel 2017-05-28 21:46:28
haha, ok can you do the table thing for the report so i can pdf it

corypatterson 2017-05-28 21:48:25
yep, done

corypatterson 2017-05-28 21:48:42
@marcor is the user story nearly done?

marcor 2017-05-28 21:53:50
https://docs.google.com/document/d/12MOk3rls-GknO021_i-RWymuoNimA6vPNMtFJ65XL5Q/edit?

marcor 2017-05-28 21:53:53
hi

marcor 2017-05-28 21:53:57
it is done

marcor 2017-05-28 21:57:28
Hey guys, quick update. App froze when exporting the movie. i just started export again. its taking a

daniel 2017-05-28 22:02:14
OK

daniel 2017-05-28 22:02:54
PM report and user guided styled and added to git, check em out

daniel 2017-05-28 22:03:42
The Design ones i updated yesterday are cool too

daniel 2017-05-28 22:07:37
DO we need to include updated slack/ trello logs

daniel 2017-05-28 22:09:00
also meeting mins

marcor 2017-05-28 22:09:39
Ooh yeah, I'll format them in the same google doc I uploaded earlier

daniel 2017-05-28 22:09:51
Ok thanks

daniel 2017-05-28 22:10:01
ill get the logs from slack and trello

daniel 2017-05-28 22:11:05
Is the video still exporting @marcor

marcor 2017-05-28 22:11:31
Yep :)

marcor 2017-05-28 22:11:41
At 20%

daniel 2017-05-28 22:11:53
ok
